- Laibraries: MUI, Shadcn/ui ,
- RestFull Api's , Integration With Redux.
- Worked with User-friendly and interactive UI.
- Web2 API Integration.

ABOUT ME

I am a passionate and detail-oriented Front-End Developer with a strong foundation in building responsive, user-friendly, and visually appealing web applications. With expertise in modern technologies like React.js, Nextjs, JavaScript (ES6+), HTML, CSS, ReactBootstrap and Tailwind CSS, I specialize in transforming design concepts into seamless, interactive, and high-performance digital experiences.

WORK EXPERIENCE

EXPERIENCE:

Front-end Developer, Blockmob Company (March2024 –currently 2025)

1.5 year experience in...

PROJECT:

Gaya, IGO, Piqsol, Magnus, Evox, Raid AI and

Naitram – NFT-Based Event Ticketing System

ProjectExplanation:

- Developed a blockchain-based platform for issuing, selling, and managing event tickets as NFTs (Non-Fungible Tokens).
- Integrated smart contracts (e.g., Ethereum) to automate ticket issuance, transfers, and ownership verification.
- Implemented features like royalty mechanisms for secondary ticket sales, ensuring revenue sharing with event organizers.
- Utilized blockchain technology to enhance transparency, security, and scalability in the ticketing process.
- Technologies Used: Blockchain (Ethereum), Smart Contracts , Web3.js, Next.js, Node.js, IPFS (for decentralized storage).
